FOR IMMEDIATE RELEASE

Phillips Plastics Corporation® Awarded 2007 Lilly Global Supplier Award

Prescott, Wisconsin - Phillips Plastics Corporation, a forty-three year-old custom injection molder of plastic and metal, was recently honored with a 2007 Lilly Global Supplier Award. This is the second year in a row that Phillips has received this award. The Company was presented with the distinction on August 1, 2007 in Indianapolis, Indiana. Phillips was also selected to receive the first ever Lilly Supplier Relationship Management Award, which is the result of Phillips' above and beyond efforts to maintain and grow the relationship with Eli Lilly and Company.

According to Brad Wucherpennig, Phillips' President and COO, "Winning this award makes me especially proud of our company, for it represents recognition from the marketplace that we truly are a preferred, world-class supplier." Eli Lilly and Company has a supplier base of approximately 6,000, of which, 100 are nominated for the Award. Phillips Plastics was one out of a pool of 11 given the award this year. The Company has worked with Eli Lilly and Company for over ten years.

The award was created in order to recognize the exceptional efforts of suppliers and the Eli Lilly and Company personnel who work with them. The annual award allows Eli Lilly and Company to reward suppliers who provide a competitive edge.

About Phillips Plastics

Phillips Plastics Corporation is a high-tech custom injection molder of plastic and metal with annual sales of over \$250 million. The Company employs 1,600 people in 15 locations throughout the United States, including design centers in Wisconsin and California, and a medical campus with 176,000 square feet of FDA registered facilities dedicated to high volume medical and clean room manufacturing. Phillips Plastics provides complete services from concept design, rapid prototyping, and tooling through production, assembly, packaging and distribution to virtually every market. In addition, the Company is breaking ground on a 30,000 square foot addition at its Medical Molding and Assembly facility which will house a 10,000-square-foot, class 100,000 clean room and 30 additional injection molding machines. The expansion will allow the Company to provide additional services to the medical device, medical combination products, and medical component molding markets.
